

DIGIFORT

REFERENCE BOOKLET

2026

DIGIFORT 2026 REFERENCE BOOKLET

The reference sites featured in this booklet represent a curated selection of Digifort deployments from around the world, contributed by our network of distributors and system integrators.

Not all sites are included. Some installations are considered sensitive, and details cannot be disclosed for security or confidentiality reasons. For those that are featured, information is intentionally limited to basic project details.

Every site listed has been approved for publication by the respective end-user, and each represents a deployment where the solution has been successfully implemented and the customer's requirements have been met."

These references are a reflection of who we are. Each project represents a real commitment met, a requirement fulfilled, and a customer who trusted us to deliver. That trust is not something we take lightly.

A wide-angle photograph of the Great Hall of the People in Beijing, China, under a clear blue sky. The building is a massive neoclassical structure with a series of tall, white columns supporting a large portico. The Chinese national flag is flying from a long row of poles along the top of the building. In the foreground, a wide set of stone steps leads up to the entrance, with a few people walking on them. The text "Government Projects" is overlaid in a large, white, sans-serif font across the lower half of the image. A thin white line with a small circle at its end is positioned to the left of the text, extending from the left edge of the frame towards the text.
