INTELLIGENT VIDEO ANALYTICS

Responsible Gaming

▶ Ensure compliance with responsible gaming regulations
▶ Centralised / Distributed model support
▶ Self Exclusion Onboarding portal
▶ Real time Monitoring and Alerting

VIX VIZION'S IMAGUS INTELLIGENT VIDEO ANALYTICS/FACIAL RECOGNITION SOFTWARE PROVIDES A SIMPLE ACCURATE SOLUTION FOR COMPLYING WITH RESPONSIBLE GAMING REGULATION AND HELPING MANAGE CUSTOMERS IN YOUR LICENSED VENUE

HARM MINIMISATION

• Patrons can exclude themselves at the licensed venue or through a centralised service.
• Proven track record in crowded and unstructured scenes and challenging environments with exceptional detection accuracy including side on faces, glasses, hats and masks.
• Imagus Video Analytics can be integrated with the licensed venues VMS/CCTV systems.

REAL TIME MONITORING AND ALERTING

• Self excluded patron's faces are tagged on enrolment.
• Patrons are checked against the self exclusion database upon entering a licensed venue or gaming room.
• Alerts are raised in real time and can be sent to key staff/duty manager via SMS , mobile phone or email.

SELF EXCLUSION ONBOARDING PORTAL

• Easy enrolment of self excluded patrons through an onboarding portal.
• Image quality is enhanced for clarity and usability.
• Can be used with existing enrolment processes.

VIX VIZION AND PRIVACY

Imagus software has been designed with privacy principles and guidelines in mind. Contact Vix Vizion to learn how Imagus software operates to ensure data is protected and managed securely.
