NEXI-CLT-ULT-27

Desktop Tower Client Workstation

DESCRIPTION

The NEXi **(CLIENT-ULTRA)** is a high-performance desktop tower workstation engineered to drive up to **8** independent displays or a unified video wall spanning **300 inches**.

Purpose-built for digital signage, interactive display systems, and mission-critical control environments.

Changeable from dual **RTX-A1000** GPUs to a single **RTX-5070**, the system now delivers higher output performance while supporting resolutions up to **7680 × 4320 (8K)**.

This enhances visual clarity, detail, and overall immersive fidelity across multi displays.
