Hanwha Vision

IP Audio
System

Elevate your surveillance systems

Meet Hanwha Vision's brand-new IP Audio System that will elevate your surveillance systems to a higher level. Other than security, the IP audio systems enable you to gain operational efficiency. Easy to install, use & manage can be supported with following features:

4 IN 1
All-In-One
Pure Standalone

Simple installation with built-in IP amplifier

PoE & PoE+
Dual Support

Enables higher quality sound & higher volume

TTS
Text to Speech

Supports multiple languages with female/male voices

Monitoring
Status checking

Easy to check out sound and status from audios

SIP
PBX integration

Allows PBX phones to announce with speakers

Scheduler
Day, Week, Month and Year

Helps set up audios with BGM & announcements

Customized security strategy

IP Audio System is simpler to install and integrate with video surveillance systems than analog ones. It gives you better options: easier to use and more cost-effective. Plus, our new IP Audio System is compatible well with them.

You can also proactively deal with events detected by cameras by immediately giving the right messages to audiences with IP speakers.

Adding IP Audio System to the video surveillance system gives us a wide range of opportunities allowing customized security strategy under multiple environments and circumstances.

Prevent any hazards around your property
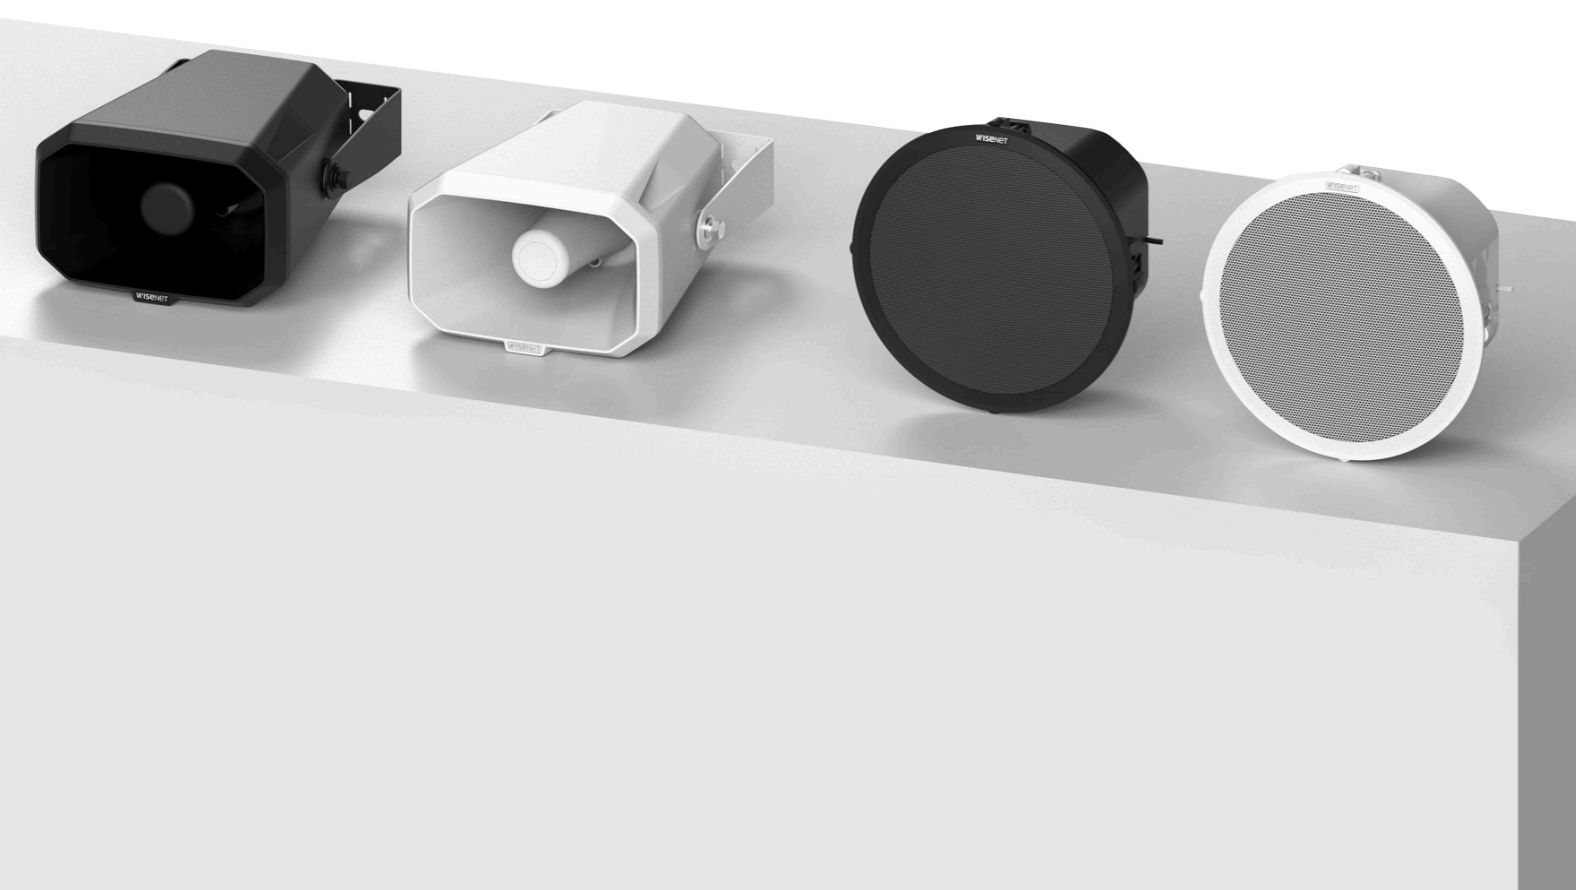

The compelling combination of camera and audio system helps you take proactive action right after detecting any intrusion attempts. The alarming message through IP audio systems effectively warns intruders and prevents any predictable losses.

USE CASE EXAMPLE
Fence / Borderline

1

2

3

4

Please stay away from the fence

Offer a better and safer banking experience at ATM

You can maintain security and order by using cameras equipped with analytics such as a social distance alarm to trigger pre-recorded announcements for customers in line like "Please keep your distance" with IP speakers.

USE CASE EXAMPLE

ATM

1

2

3

4

Please keep your distance

Prevent any risks and keep stores **well-managed**

Gently notify customers with the Dwell time trigger equipped with cameras to release an announcement like "Welcome to our store. If you need any assistance, please call our staff near you." This message would intervene in any suspicious moves from a stranger.

USE CASE EXAMPLE

Shop / Department Store

Welcome to HV, if you need any help, please find staff around you.
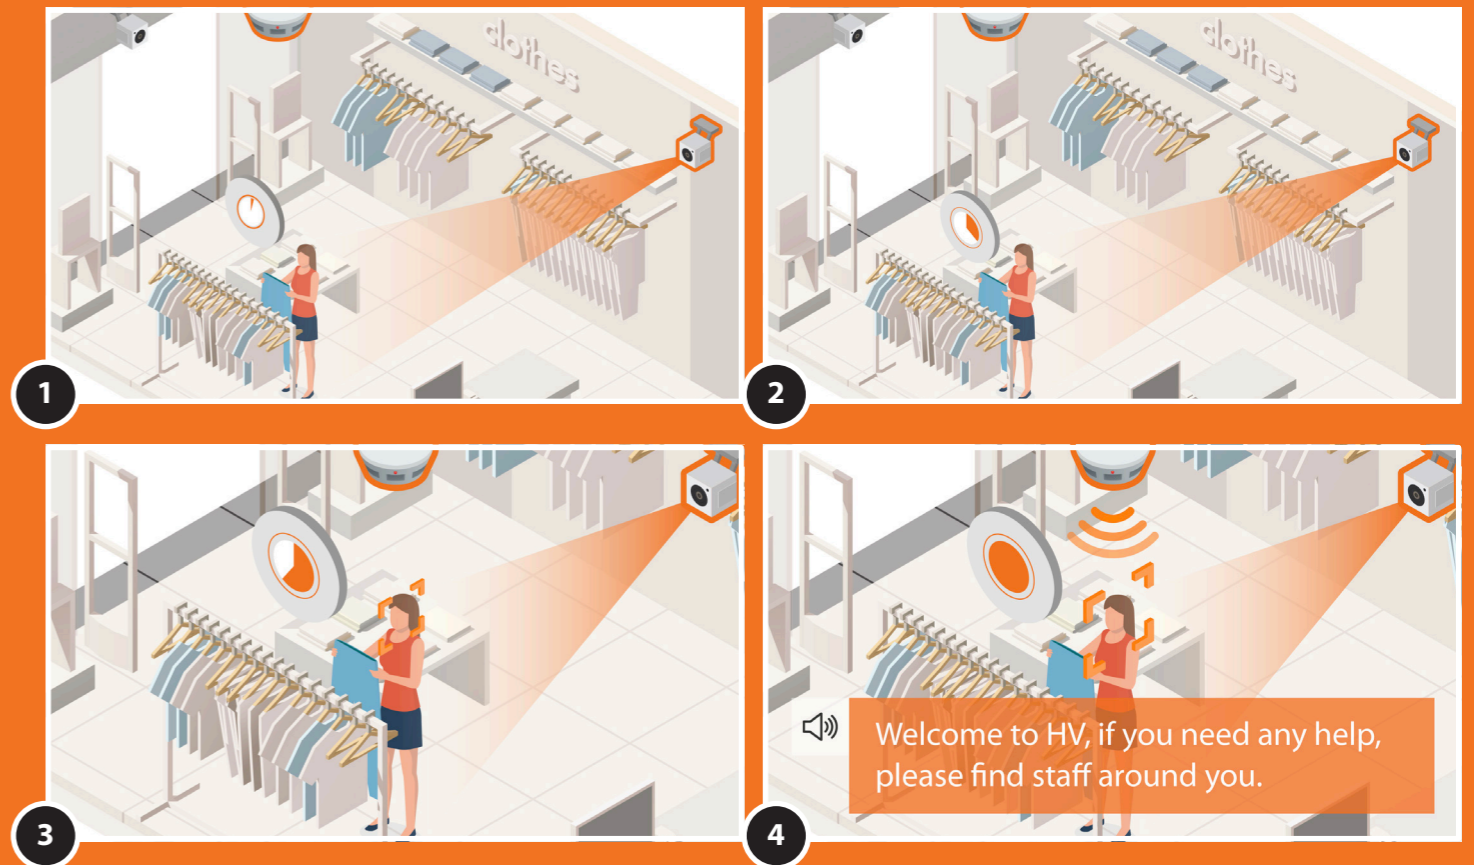

Efficiently operate buildings with background music and broadcast

Add a lively mood to the customer experience. IP speaker allows rich-sounding background music. In addition, it's easy to manage announcements at any time and anywhere with live or pre-recorded voices.
